**NOTICE OF CONSTRUCTION
ON
BRICKER STREET
FROM BARNES AVENUE
TO J.H. ROBERTSON SPORTS FIELD

TOWN OF SAUGEEN SHORES**

The Town of Saugeen Shores proposes to construct sidewalks on the west side of Bricker Street from Barnes Avenue to the J.H. Robertson Sports Field

The 1.5 metre wide concrete sidewalk will be placed between the hydro poles /transformers and the curb line.

It is anticipated that the work will start in mid April.

Vehicular access to your home will be maintained except when the Contractor is working in your immediate area. Your driveway will be required to be closed for 24 hours after the sidewalk is placed to allow for the concrete to cure.

If you have any encroachments on the town boulevards such as sprinklers, plants, landscaping features etc. please remove all items prior to April 10th as the Town of Saugeen Shores or the contractor will not be responsible for these items.

The sidewalk will be placed to minimize the driveway restoration, however depending on the condition and elevation of your existing driveway part of your driveway may be replaced at the Town's cost. As part of this project the curb at all driveways on the west side of Bricker Street will be modified to lower the back of curb to allow for a lower transition to your driveway off the road.

The Contractor for this sidewalk project is Autoform Contracting.

If you require additional information or have any concerns, please contact David Burnside at (519) 832-2008 Ext. 123

We wish to thank you in advance for your patience and co-operation during the construction period.
