TOWN OF SAUGEEN SHORES

Information to Property Owners

Miramichi Bay Road and North Shore Road

September 22, 2009

As you may know the Town of Saugeen Shores applied for funding Intake 2- Canada Fund Communities Component for asphalt paving of Miramichi Bay Road and North Shore Road. The project has been approved for 2/3 funding by the two senior levels of government.

General

The project will include repaving the existing asphalt road platform with paved shoulders and an off-road multi use path where possible.

The preparatory work for the off-road multi use path will begin this year which will include several culvert extensions and excavation and placement of the granular base for the multi use path.

The attached plan indicates the various sections of the trail/path proposed.

Miramichi Bay Road

The section from South Street to approximately Bayview Point will include paved shoulders on both sides of the road for non-vehicular use.

The section from approximately Bayview Point to Concession 10 will include off road multi use path for non-vehicular use on the west side of the road immediately east of the stone revetment.

North Shore Road

The section from Concession 10 to approximately 144 North Shore Road will include off road multi use path for non-vehicular use on the west side of the road immediately east of the stone revetment.

The section from approximately 144 North Shore Road to 124 North Shore Road will include paved shoulders on both sides of road for non-vehicular use.

The section from approximately 124 North Shore Road to McVicar Street will include off road multi use path for non-vehicular use on the west side of the road immediately east of the stone revetment.

Limitations

The Town would prefer a continuous off-road route however due to physical limitations there are two areas where paved shoulders will be part of the path.

Timing

The preparatory work for the off-road multi use path will begin this year which will include several culvert extensions and excavation and placement of the granular base for the multi use path.

The asphalt component of both the road and multi use path will be completed in spring 2010.
