NOTICE TO RESIDENTS OF HIGHLAND STREET

FROM SANDY ACRES ROAD TO MARKET STREET

TOWN OF SAUGEEEN SHORES

As you are aware, the high ground water continues to be problematic for the contractor. Omega Contractors has restarted the installation of the sanitary sewer system for the Concession 10 project, from Highland Street southerly. The work was delayed to allow time for the dewatering pumps to lower the ground water to allow the installation of the sanitary sewers to proceed.

Unfortunately, the dewatering pump at Piccadilly Drive will continue to pump until at least the contractor is through the Highland Street and Parkwood Drive intersection.

The contractor has placed the sanitary sewer north from Sandy Acres Road to approximately 15 metres south of Joseph Street.

The contractor estimates that the sewer installation should be in the area of Parkwood Drive intersection early next week weather permitting. The Contractor has again investigated the water table south of Parkwood Drive and is planning to continue installing the sanitary sewer south of Parkwood without dewatering. This can not be guaranteed as they may encounter a high water table in the southern section as well and may revert to additional dewatering.

During this time of construction we would ask that recycling and garbage pick-up be carried out as normal by the homeowner. If the portion of road in front of your home is closed the contractor will move your garbage/recycling to an area that the collection trucks can access and bring your blue box back to your property. Please put your house number on your blue box and or garbage can so it can be returned to the correct house.

The Consulting Engineering firm that is working on behalf of the municipality is Genivar (formerly Henderson Paddon & Associates of Owen Sound). If you have any questions or concerns with the day to day construction activities, or driveway access please contact the Genivar's site representative, Mr. Len Perdue. (cell phone number 519-378-3029)

As Len is onsite during most activities, he can respond and provide day to day information about the project quicker than the Town as the Genivar staff is on site daily.

If you require additional information or have any concerns, please contact David Burnside at the Town of Saugeen Shores at (519) 832-2008 Ext. 123 or Stuart Doyle at the Town of Saugeen Shores at (519) 832-2008 Ext. 101.

The Town of Saugeen Shores wishes to thank you for your co-operation, understanding and acceptance of the inconvenience that this major construction project will cause this spring/summer.
