Master Plan - Noydige Bruce Road 33 to intersect Bruce Road 25 at Future Bruce Street Location and Construct a New Storm Sewer on Bruce Road 25 to a New Outlet at Lake Huron

1. The County Plan recommends the extension of an 800mm storm sewer system to convey the 1:50 year design flow from the future Bruce Road 25 storm sewer to a new outlet at Lake Huron. The extension would be aligned with existing RM County linkages and drainage subdivisions and would connect to the future Bruce Road 25 storm sewer at a new outlet at Lake Huron.
2. The County Plan recommends the extension of a 1300mm storm sewer system to convey the 1:50 year design flow from the future Bruce Road 25 storm sewer to a new outlet at Lake Huron. The extension would be aligned with existing RM County linkages and drainage subdivisions and would connect to the future Bruce Road 25 storm sewer at a new outlet at Lake Huron.

3. The Master Plan recommends the extension of a 1050mm storm sewer system to convey the 1:50 year design flow from the future Bruce Road 25 storm sewer to a new outlet at Lake Huron. The extension would be aligned with existing RM County linkages and drainage subdivisions and would connect to the future Bruce Road 25 storm sewer at a new outlet at Lake Huron.

4. The Master Plan recommends the extension of a 1050mm storm sewer system to convey the 1:50 year design flow from the future Bruce Road 25 storm sewer to a new outlet at Lake Huron. The extension would be aligned with existing RM County linkages and drainage subdivisions and would connect to the future Bruce Road 25 storm sewer at a new outlet at Lake Huron.
